CSD 1114: Web Technologies I

Course Project Proposal

As a part of your course project, you are to create a project proposal that provides an outline about your choice of website and what are the relevant contents you are planning to show in your website. The following are the must have pages for the website:

1. Home Page
2. About Us Page
3. Contact Us Page
4. Search Page
5. A page (or multiple pages) relevant to the area of your choice

- All of the pages must have a common menu that contains links to all the different pages so that you easily navigate from any one page to another.
- Create a wireframe (discussed in Lecture 1) for each of the pages in your website.
- Create a sitemap (discussed in Lecture 1) for the website.
- Now complete the checklist in the next page by answering the question in blue (replace the text in blue with your answers). You may use extra page if you need more space for writing:

Complete the document and upload in the link provided in moodle

Topic	Web Designer Questions
Purpose of the website	What is the purpose and goal of the website?
Target Audience	Describe the target audience (age, gender, demographics, etc.) What information is most relevant to the users?
Graphics	What graphics will you use on the website?
Color	What colors will you use to enhance the purpose and brand?
Typography	What font styles will you use within the website?
Accessibility	How will the website accommodate people with disabilities?
